SUMMARY

Frontend Developer with 2+ years of experience building scalable and maintainable applications in cybersecurity and SaaS domains. Passionate about frontend architecture, performance optimization, and mentoring. Thrive on learning new technologies, exploring implementation patterns, and continuously upskilling to stay current with the ever-evolving tech landscape.

EDUCATION

Bachelor of Engineering, Automobile Engineering 2020
Karpaga Vinayaga College of Engineering and Technology — 6.84 CGPA

SKILLS

Languages	JavaScript, TypeScript, HTML, CSS
Libraries	ReactJS, Next.js, Redux, Context API
Styling	TailwindCSS, Vanilla Extract CSS Bootstrap, Material UI
Tools	Git, GitHub, Vite, Webpack, Figma
Other	REST APIs, Microfrontend Architecture, D3.js, Performance Optimization

EXPERIENCE

SDE - 2 Jun 2023 – Present
Unosecur GmbH

- Took full ownership of frontend architecture for cybersecurity platform including NHI, IDP and IAM Analyzer.
- Built and maintained a scalable, reusable UI component library improving dev velocity and design consistency.
- Implemented microfrontend architecture to modularize development and enable independent deployments.
- Developed and shipped 10+ key features and UI redesigns, including tailored solutions for clients like Rakuten, Razorpay, and Walmart—contributing to successful paid POCs and strengthening client trust.
- Worked on complex data visualizations using D3.js to represent IAM analytics effectively.
- Collaborated with PMs and designers to align technical implementation with product vision.
- Reviewed PRs to enforce code quality, uphold frontend architectural standards, and ensure the delivery of efficient, scalable solutions and technical discussions.
- Mentored junior developers and assisted senior devs in performance tuning and debugging.

Frontend Developer Jun 2023 – Feb 2024
Sysotel.ai

- Developed B2B UI using React and Next.js; improved load time by 30
- Delivered CMS features used by 50+ clients; reduced content update time by 60
- Integrated third-party APIs including booking engines and yield automation.

PROJECTS

Weather App: React + Tailwind + OpenWeather API. Shows real-time weather, hourly/daily forecast, city info, wind/sun data. [\[Live Link\]](#)

Recipe App: React + Spoonacular API. Responsive UI to explore and view cooking instructions. [\[Live Link\]](#)
